

CRAFTED&SMOOTH

DIY SHOW

Thank you for purchasing!

Table of contents

General	page 02
What's in the box, what can you modify easily, specifications, guides...etc.	
Change the logo	page 03
Modify Text Placeholders	page 04
Modify Video Placeholders	page 06
Opener A	page 07
Extended opener with rolling tools, 3 titles (text placeholders with logo), 5 short video placeholders.	
Opener B	page 07
Cleaner opener with rolling tools and 3 titles (text placeholders with logo).	
Lower Third	page 08
Clean, elegant lower third with logo and optional rolling tools. 2 lines for custom texts.	
Upper Title	page 08
Clean, elegant upper title with logo and optional rolling tools. 2 lines for custom texts. Great for showing the steps of the work.	
Setting Time – The Clock	Page 09
An elegant smoothly animated clock showing the logo, one text line (title) and 2 lines for showing the time of setting, solidification, drying....	
Transitions 3x	Page 10
1 st : Title (text placeholder) with logo. 2 nd : Rolling tools. 3 rd : 3D rotating extruded logo.	
Materials List	Page 11
An upper title with 2 lines of custom text and a box for the used tools or materials. Elegant and clean.	
End Credits	Page 12
Rolling tools with credits list with optional sponsor logo and text + 1 custom title (text placeholder) with logo and 2 optional video placeholders for the end.	

General

What's in the box?

After effects project files –CS6, CC12, CC14, CC15, CC17

Opener A: 0:25s, **Opener B:** 0:25s, **Lower Third:** 0:07s, **Upper Title:** 0:07s, **Setting Time:** 0:08s, **Ingredients List:** 0:15s, **3x Transitions:** 0:03s, **End Credits:** 0:25s

Stock footages – DIY acts – 1920x1080px, 25fps, H.264, QuickTime:

panning tools on a table: 0:05s, **drilling a hole:** 0:05s, **hammering a screw:** 0:05s, **using sealant gun:** 0:05s, **planing the edge of a plasterboard:** 0:05s

Stock footages – rotating tools elements – 1400x1500px, 25fps, H.264, QuickTime

claw hammer, combination pliers, cordless drill, drill, folding ruler, hammer, leveler, measuring tape, nails, paint roller, scissors, screwdriver: min. 0:05s each, all rotating, white background with reflection.

Audio: The preview version of **Lacisz's Swing Jazz TV Show Ident** – Wave 16bit, 44.1Khz

HELP

documentation.pdf (this file)

Project File Specifications:

All *.AEP files are compatible from After Effects CS6 and upwards. No external plugins required, only built-in After Effects plugins.

Video file details: **Full HD**, 1920x1080px, square pixels, progressive 25 frames per seconds.

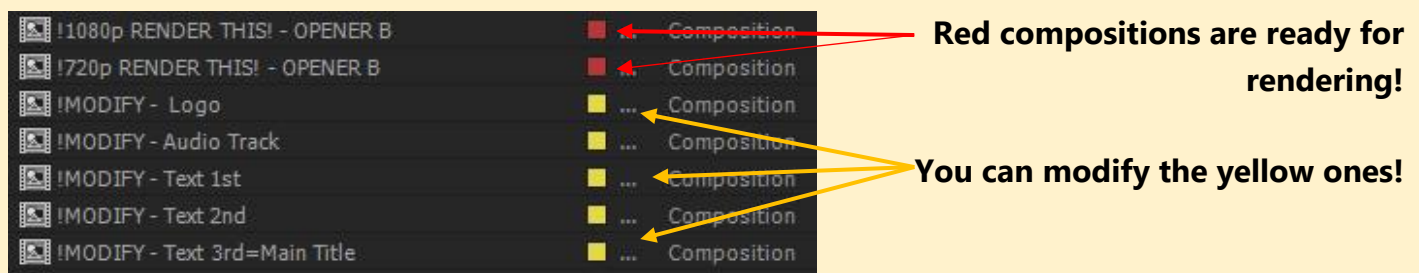

All footages you can see in the preview are included! A complete package!

ONLY 1 FONT IS USED, EDMUNDSBURY SERIF, [You can download freely from DAFONT](#)

[THIS HELP FILE IS FROM THE ORIGINAL COOKING SHOW – FRESH&SMOOTH](#)
THE EDITING METHOD IS THE SAME, ONLY SOME ILLUSTRATION PICTURES DIFFER HERE!

General naming, guiding and color coding inside AEP files:

Compositions and layers important to you are starting with an exclamation mark: !

THE LOGO, the “chef hat” is included (AI file), but of course you can change it to yours!

I recommend to put **black, circular** or **equal sided** logo here with **transparent** background (PNG or AI) to keep the scene clean and elegant.

There will be guidelines in every customizable placeholder to show you the visible area.

Layers inside compositions

All the layers which are not important or not easy to modify are hidden by default. If you want them to be visible, just uncheck “Hide Shy Layers” button on the composition window.

NOTE: SHY LAYERS ARE LOCKED ALSO TO PREVENT UNINTENDED MODIFICATION! 🔒

NOTE: THIS PROJECT IS NOT OPTIMIZED FOR TIMING/LENGTH CHANGES!

If you would like to change the timing of some elements anyway, you have to be an advanced AE user! I can't accept complaints about timing and its difficult modification, please not it before purchasing. Anyway, I can help you personally, just ask your question!

Modify Text Placeholders

TEXT 1ST, AND TEXT 2ND - CHANGEABLE PARTS

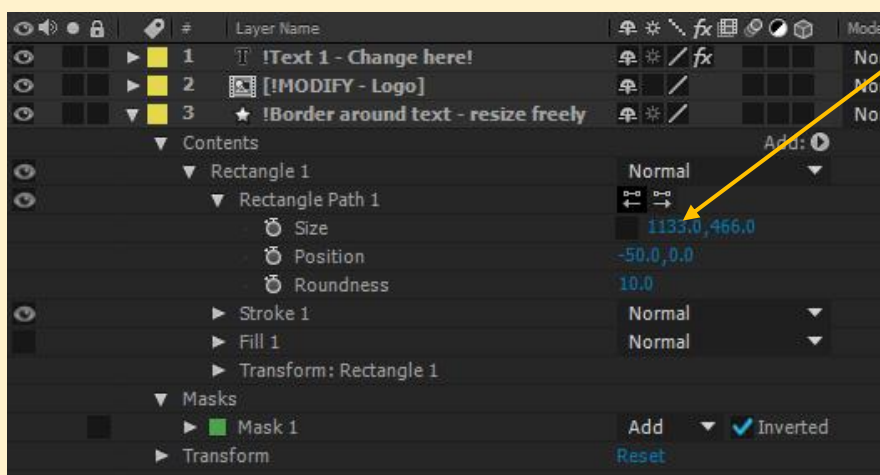

The logo (Browse **Page 03** for details) **in your file there will be different default logo and text*

The 2 lines of the 1st and 2nd Text placeholders.

Modifying the text is easy, just double click on the layer and edit.

Modify the border around the text:

If the rectangle size is not proper for the new text, adjust it in:

Layer 3/Contents/Rectangle 1/Rectangle Path 1/ Size

TEXT 3RD, AKA. MAIN TITLE - CHANGEABLE PARTS

The logo (Browse **Page 03** for details) **in your file there will be different default logo and text*

The length of these 2 thin ornamental lines

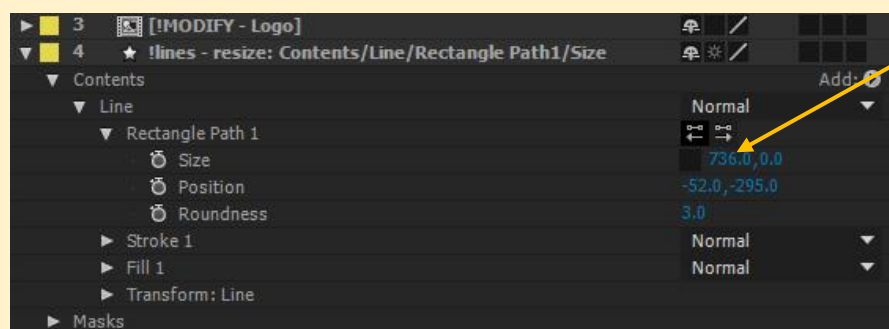

The website

The 2 lines of the big title

Text modifications are straightforward, just click inside the layers and change them.

Modify the slowly appearing thin lines around the logo:

If you prefer, you can make it shorter or slightly longer (*from 300px to 950px*) in:

Layer 4/Contents/Line/Rectangle Path 1/Size

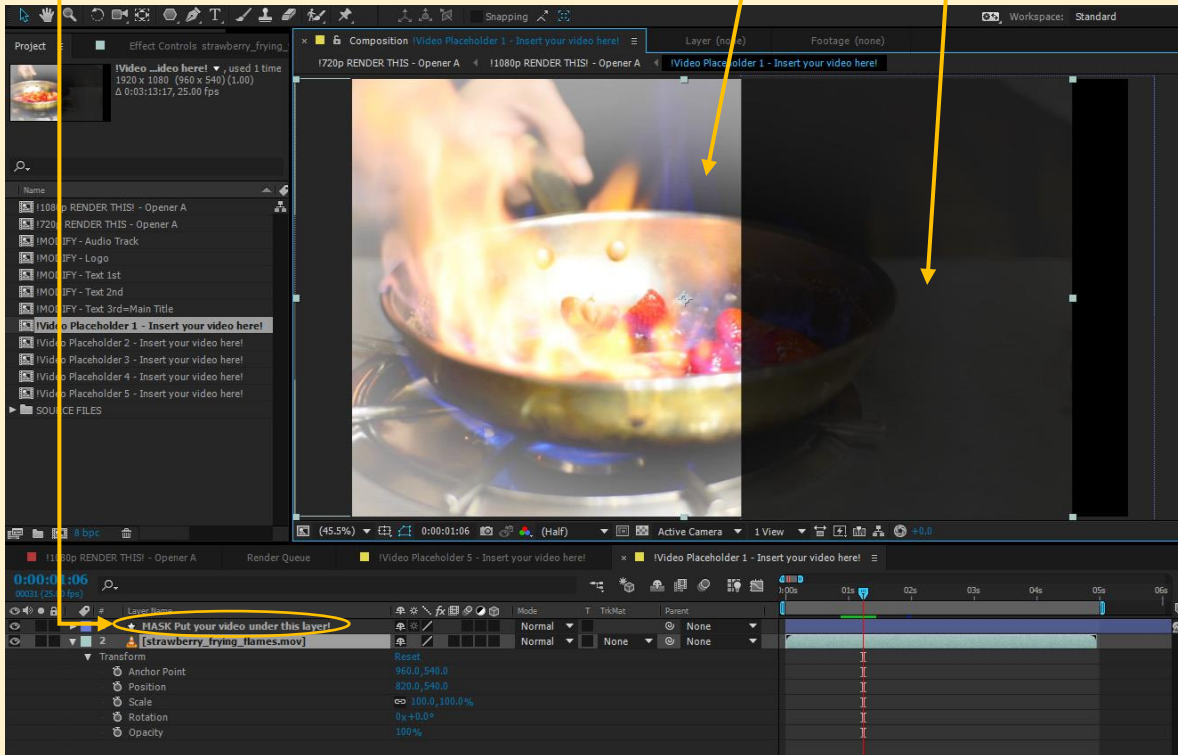

Modify the border around the text, see **Page 4**, and apply to Layer 5 in this case.

Modify Video Placeholders

FROM Video Placeholder 1 to 3, all projects - CHANGEABLE FOOTAGES

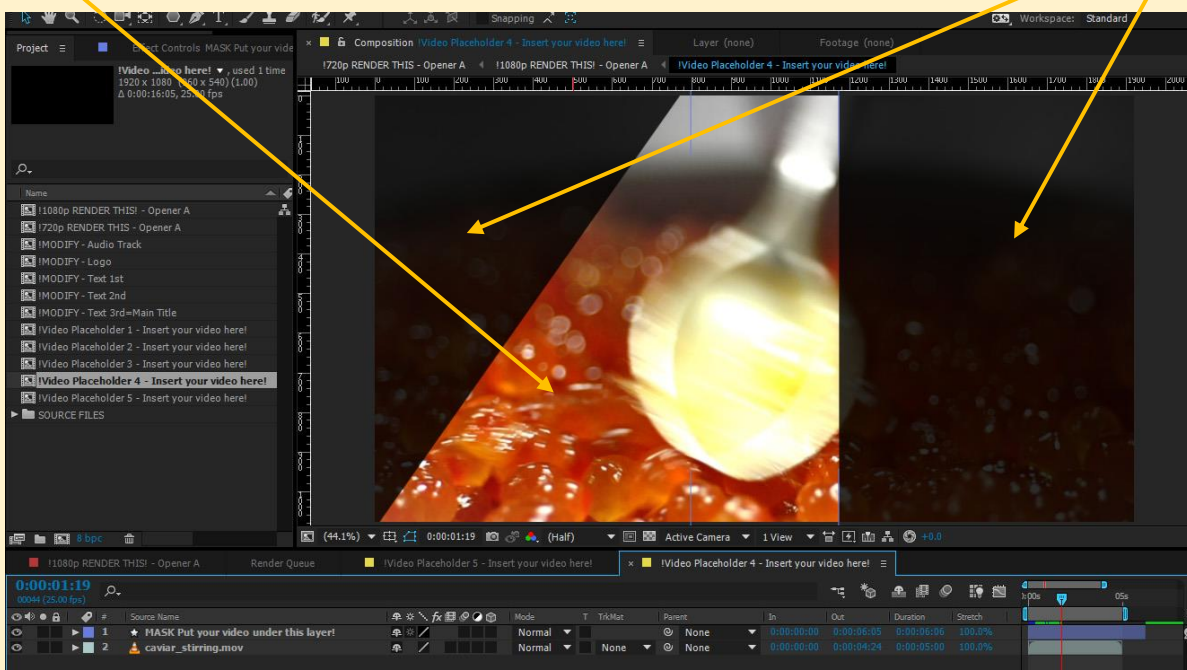

The MASK layer greys out the parts of your footage, which **won't be visible** in the full composition (Because of the "split screen" effect)

If you put your footage under the MASK layer, the **visible part** will be highlighted and you could pan and zoom freely your video.

FROM Video Placeholder 3 to 5, all projects - CHANGEABLE FOOTAGES

The same applies to the other placeholders, you can see the visible part of your footage and the MASK layer! Just put your video under the MASK layer and pan and zoom until it looks good.

Openers – for placeholder modification information, read **pages 3-6**.

Opener A – more intense

Rotating TOOLS and SPLIT SCREEN VIDEOS!

Length: 0:25 seconds

Max. resolution: 1920x1080

Frequency: 25 fps, progressive

Text Placeholder 1:

length: 5 seconds

1 logo

2 lines

Text Placeholder 2:

length: 3 seconds

1 logo

2 lines

Text Placeholder 3, aka. Main Title:

length: 5 seconds

1 logo

1 website Line

2 title lines

Video Placeholder 1:

length: 1.5 seconds

Video Placeholder 2:

length: 2.5 seconds

Video Placeholder 3:

length: 1.5 seconds

Video Placeholder 4:

length: 1.3 seconds

Video Placeholder 5:

length: 1.5 seconds

Opener B – cleaner

ROTATING TOOLS WITH FULL SCREEN TEXT PLACEHOLDERS

Length: 0:25 seconds

Max. resolution: 1920x1080

Frequency: 25 fps, progressive

Text Placeholder 1:

length: 5 seconds

1 logo

2 lines

Text Placeholder 2:

length: 3 seconds

1 logo

2 lines

Text Placeholder 3, aka. Main Title:

length: 5 seconds

1 logo

1 website Line

2 title lines

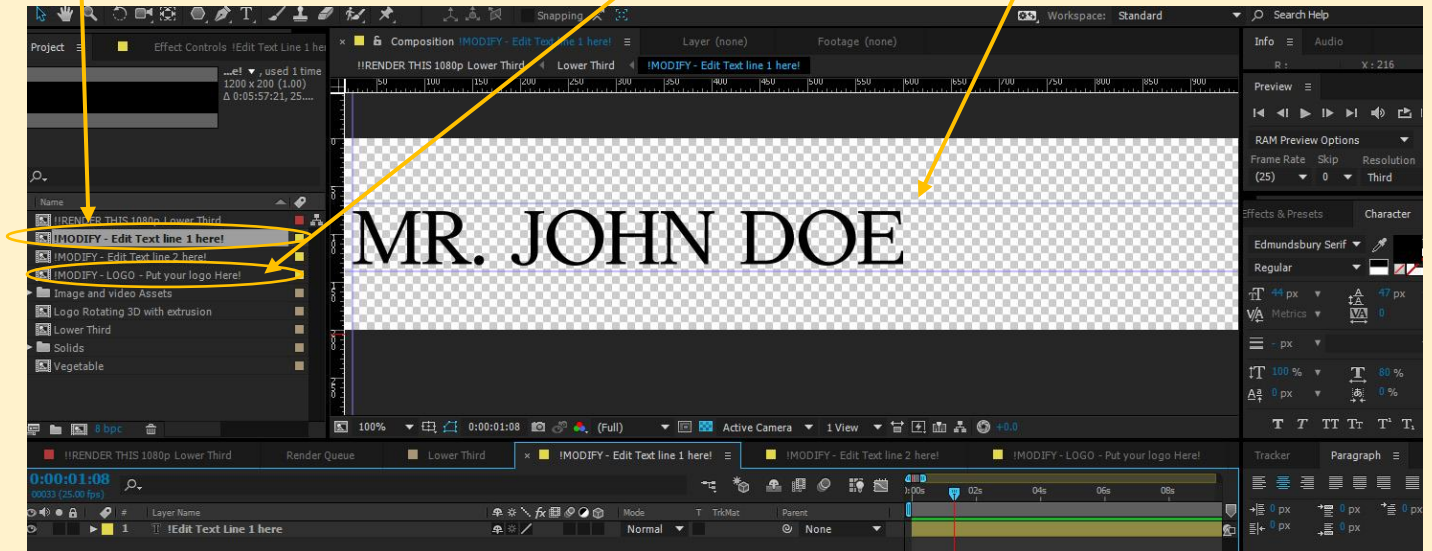

Lower Third and Upper Title

TEXT LINE 1 AND TEXT LINE 2 AND LOGO

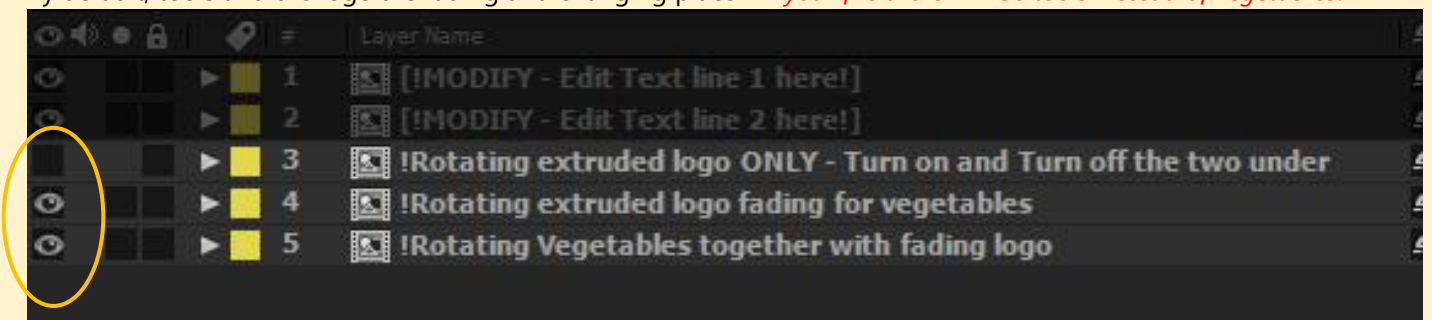

Double click on the desired composition and edit texts, stay between the guidelines.

For changing the logo, double click on the **Modify Logo composition** and see **Page 03** for details.

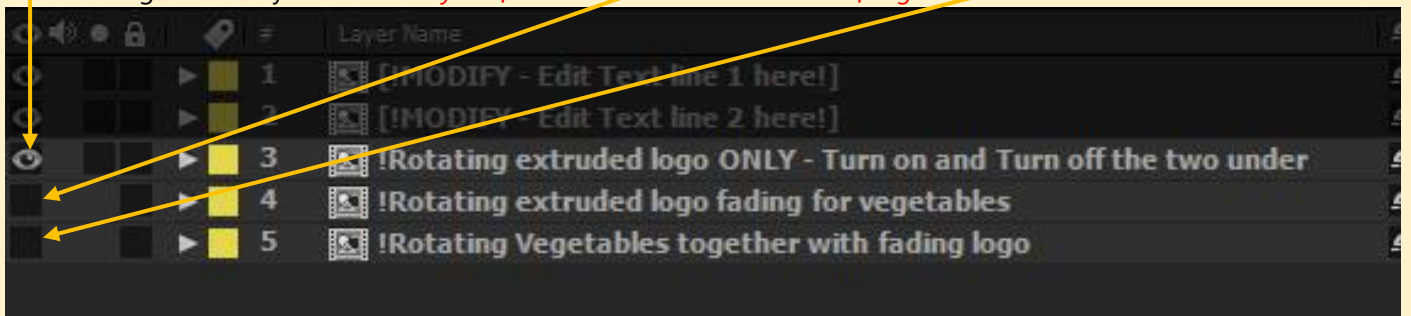

NOTE: THE LOGO WILL BE EXTRUDED TO 3D AUTOMATICALLY.

By default, tools and the logo are fading and changing place **in your file there will be tools instead of vegetables:*

TO GET RID OF THE ROTATING TOOLS

If you prefer to see the rotating logo only, turn off the fading logo layer and the fading tools and make the Rotating extruded logo ONLY layer visible. **in your file there will be tools instead of vegetables:*

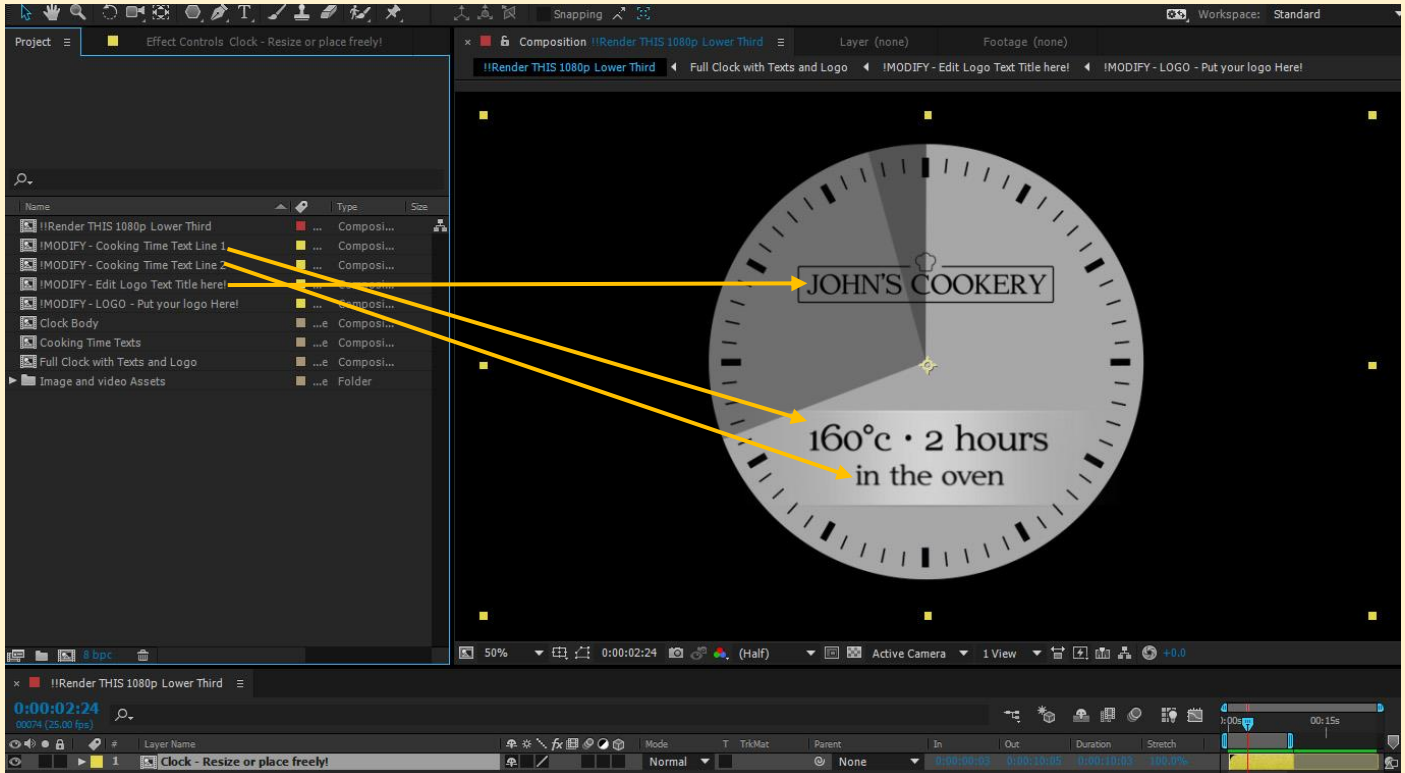

NOTE: TRANSPARENT BACKGROUND! RENDER WITH ALPHA CHANNEL OR AS A PNG SEQUENCE!

Setting Time – The Clock **in your file there will be different default logo and text*

TEXT LINE 1 AND 2 + LOGO WITH TEXT

Just use the general placeholder change methods (**Page 04**), for logo changing check **Page 03**.
You can edit the logo, the title in the logo and the two lines of the "Setting Time" text

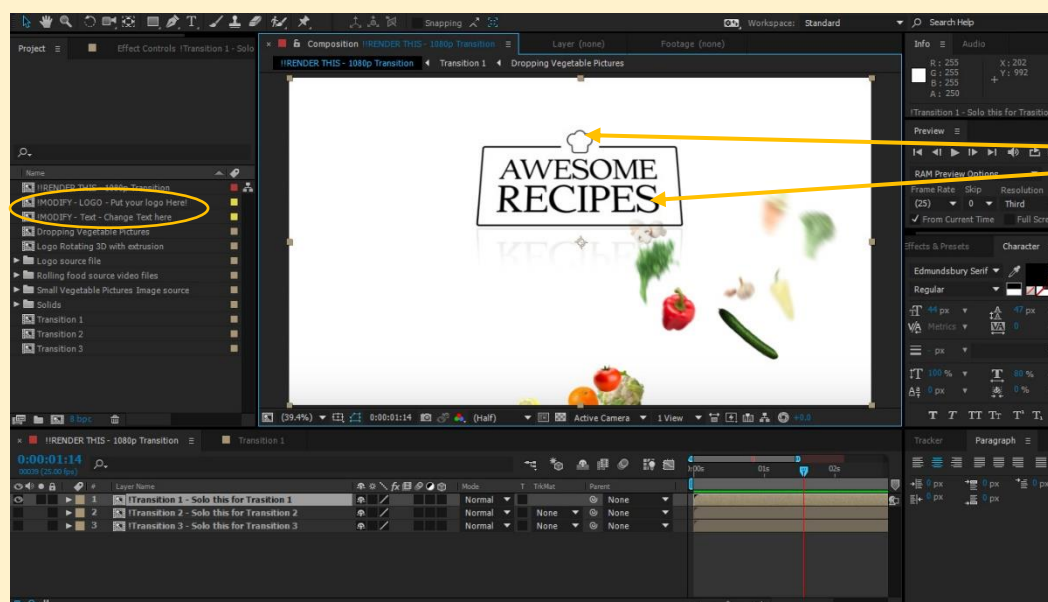

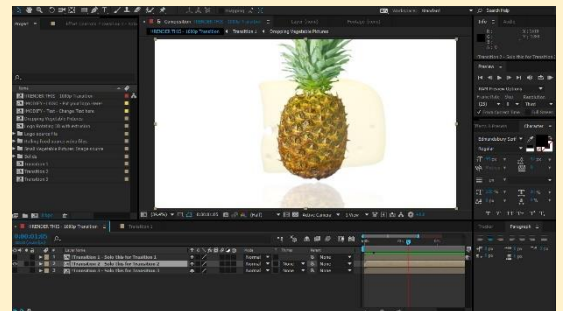

NOTE: TRANSPARENT BACKGROUND! RENDER WITH ALPHA CHANNEL OR AS A PNG SEQUENCE!

Transitions

These transitions are very easy to use. Just solo the preferred transition layer in the “**!RENDER THIS...**” composition! Please turn off the visibility of the other two layers. That is all!

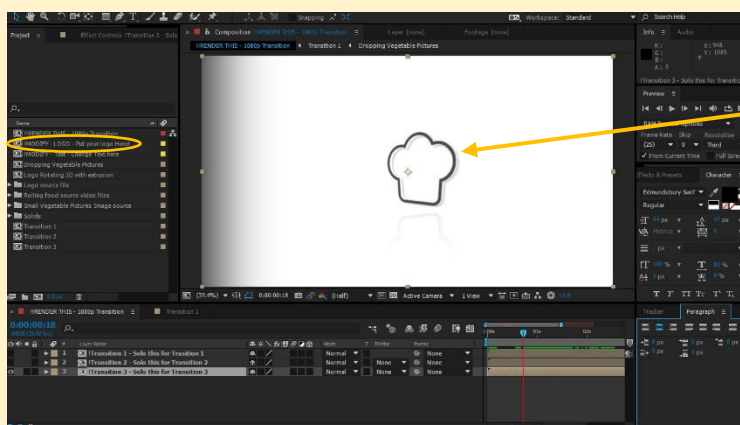

Transition 2 are ready for use after rendering with alpha channel or as PNG sequence. Here is no or text, so nothing to modify, just add to render queue and render.

TRANSITION 1 – CHANGE THE LOGO and TEXT

Just use the general text change methods (**Page 04**), for logo changing instructions, check **Page 03**.

TRANSITION 3 – CHANGE THE LOGO

For logo changing instructions, check **Page 03**.

Your logo will be extruded in depth and rotated in 3D automatically! I advise to use equal sided or circular logo here with transparent background.

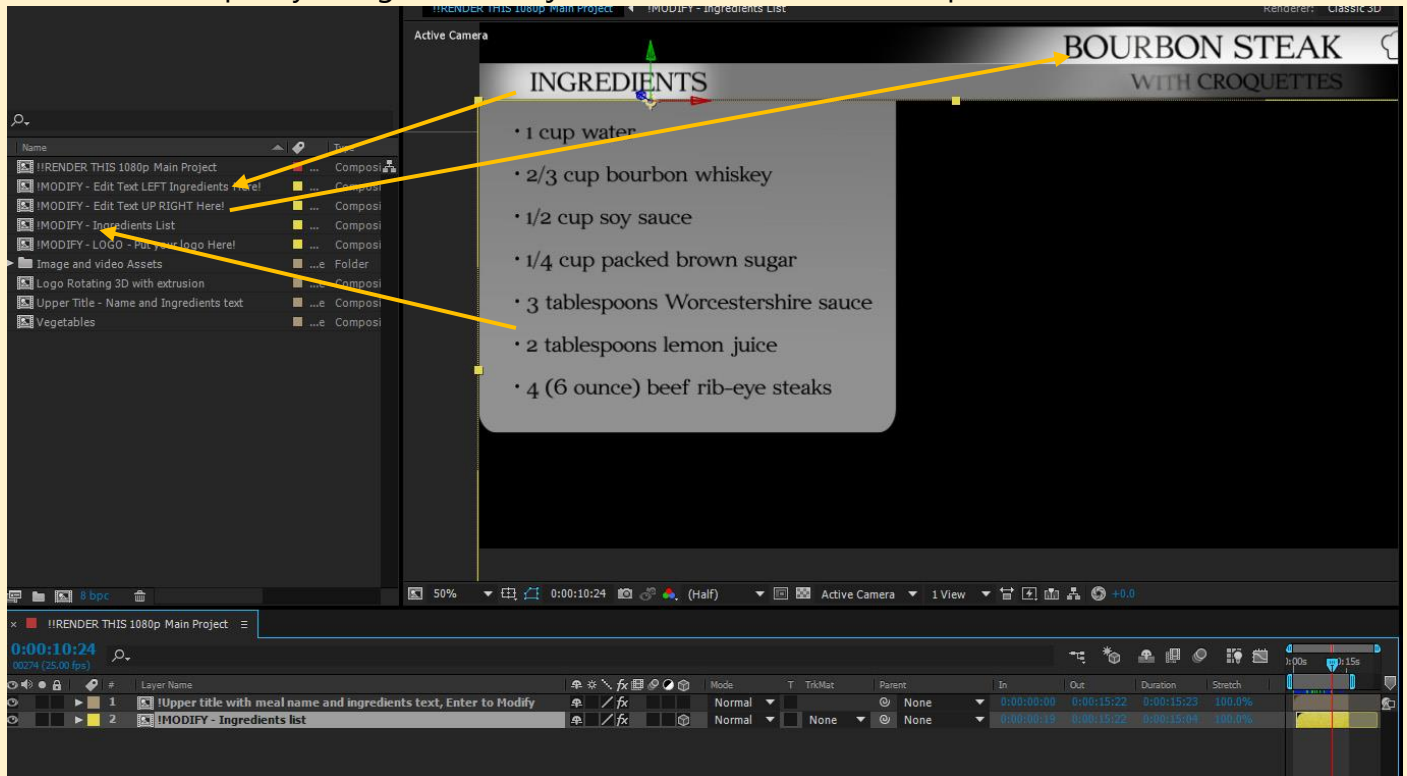

**in your file there will be different default logo*

NOTE: TRANSPARENT BACKGROUND! RENDER WITH ALPHA CHANNEL OR AS A PNG SEQUENCE!

Materials and tools List **in your file there will be different default logo and text*

TEXT LEFT “Materials” + TEXT RIGHT 2 Lines “Title” + MATERIALS LIST

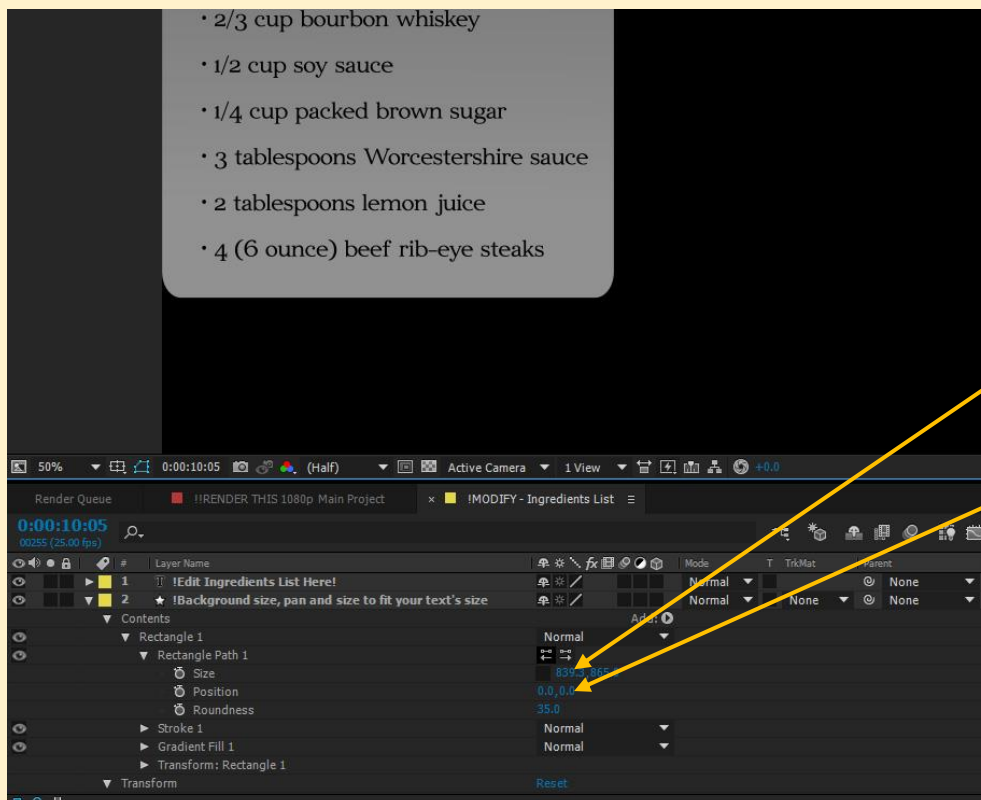

Modification is pretty straightforward, just double click on the compositions and edit the texts.

3D ROTATING EXTRUDED LOGO WITH OR WITHOUT ROLLING TOOLS

The rules on **Page 03** and on **Page 08** are applies to this logo too.

THE LIST ITSELF

After entering “**!Modify Materials List**” comp., and writing your own “recipe” you should change the size background box of the list. To do this enter:

Layer 2/Contents/Rectangle 1/Rectangle Path 1/ Size and Position as you want!

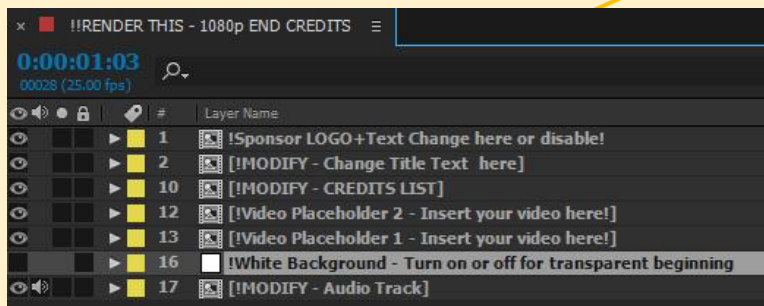

NOTE: TRANSPARENT BACKGROUND! RENDER WITH ALPHA CHANNEL OR AS A PNG SEQUENCE!

End Credits

START WITH OR WITHOUT TRANSPARENT BEGINNING (3.5 seconds)

For transparent beginning, turn off the “!White Background” in the “!RENDER THIS...” composition.

(turned on by default)

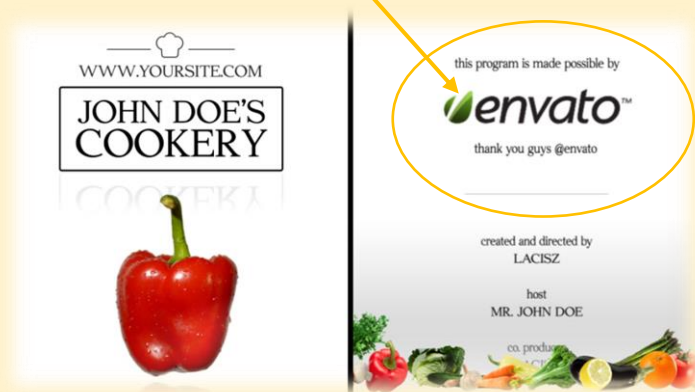

In this case you can use end credits as a transition from your last pictures to the end.

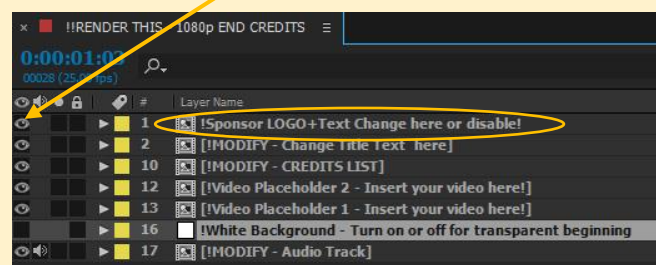

NOTE: DO NOT FORGET TO RENDER WITH ALPHA CHANNEL OR AS A PNG SEQUENCE IN THIS CASE!

HAVING A SPONSOR?

If you don't need the sponsor area, just turn it off on “!RENDER THIS” composition!

CHANGING THE SPONSOR

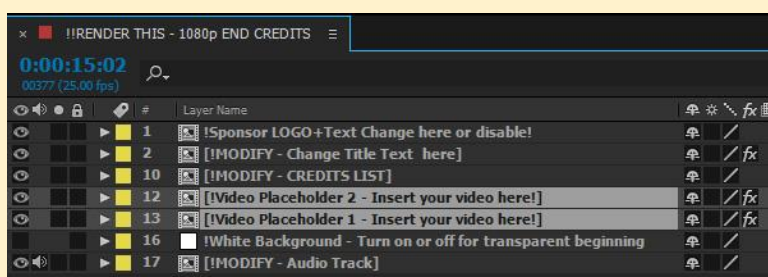

Simply enter the “!MODIFY – Sponsor logo” composition on the project panel and import your logo there.

then

enter into the “!MODIFY – Sponsor text” and replace the two lines with your. Please maintain inside the guidelines.

OPTIONAL 2x2 seconds VIDEO PLACEHOLDERS

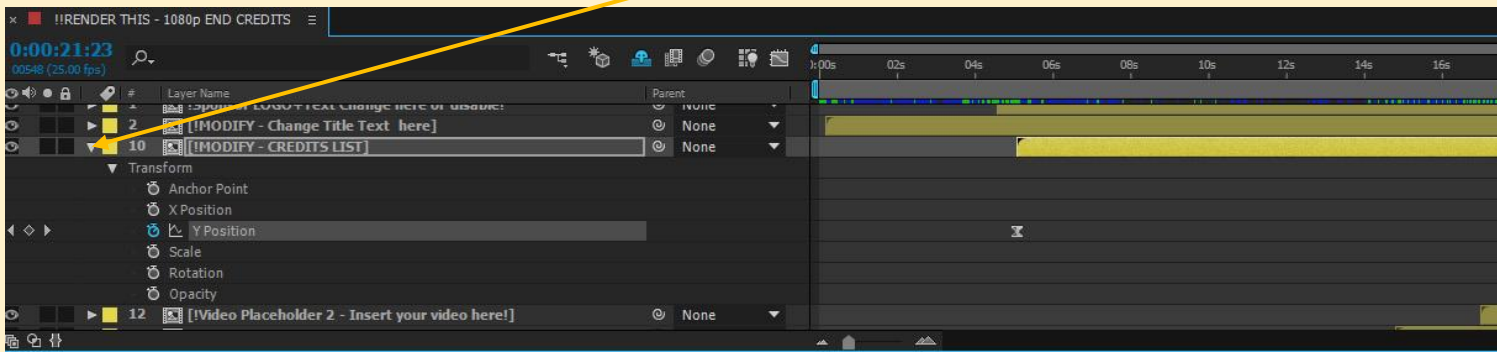

Just simply turn them off if in the “!RENDER THIS” composition if you do not need them. For changing help, see video placeholder instructions on **Page 06**.

MODIFY THE CREDITS LIST

Double click on the “!MODIFY – CREDITS LIST” on the project panel and edit the text layer there. You can also insert logos, pictures here which will be scrolling also with the text.

CREDITS LIST TIMING

1. If you have fewer items on your list, you could notice that the scrolling finishes too early. To solve this problem, enter into the “!RENDER THIS” composition and expand the properties of the layer of “!MODIFY – CREDITS LIST”.

2. Set the cursor to around 22 sec on the timeline.

3. Adjust the rightmost keyframe of the Y position forward in time, until you can see your credits list's last few items. Preview the composition and adjust if necessary.

MODIFY THE TITLE AND LOGO ON THE LEFT SIDE OF THE SCREEN

For help, see placeholder instructions on **Page 05**. **in your file there will be different default logo and text*

THANK YOU AGAIN FOR PURCHASING MY WORK! IF YOU NEED FURTHER ASSISTANCE, DROP ME A LINE!
